Planned Preventative Maintenance Solutions – Our Complete Service Package

Planned preventative maintenance ensures both the operational performance and safety of your automatic and manual door systems

All door operations, whether automatic or manual, use complex parts which are subject to continuous wear. Regular service and maintenance ensures your doors will continue to work as they should, reducing hazards to operators.

Ensuring that manual, automatic and industrial doors are safe in operation helps prevent potential injury to users and so reduce the possibility of litigation for negligence.

Over its lifetime a regularly serviced door costs less to maintain than using urgent reactive call outs and ensures reliability, optimum performance and can extend its life expectancy.

A planned preventative maintenance agreement provides regular service levels to ensure your door continues to work and to diagnose problems before failure and disturbance to your business.

Your doors are critical to your business and need regular servicing to make sure they give reliable and trouble free operation. Planned regular maintenance increases functionality and reduces expensive downtime.

Damaged doors cause loss of business, whether it's people traffic or moving goods in and out of building.

WDC, Planned Preventative Maintenance (PPM), is an individually tailored plan to ensure the highest possible standards of operational performance and safety of all doors whether automatic, manual or industrial.

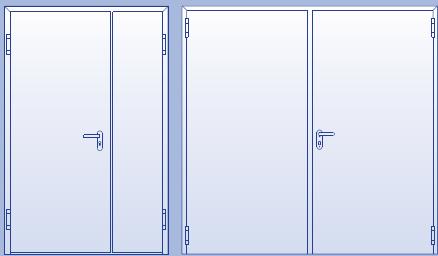

We work closely with our clients to offer a competitive, tailor-made maintenance package for all types of door systems; we recommend at least two service visits each year.

Steel Doors

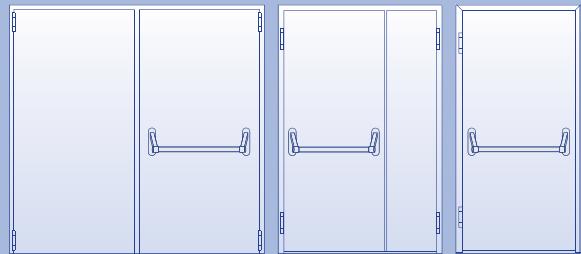

For over 30 years, WDC Service Solutions Limited have been building a national reputation for efficient reliability. Our growing list of satisfied clients evidence that our service based ethos is proving to be a great asset. Working in partnership with Strongdor, our aim is to offer and fit the best in steel and security doors. Combining our maintenance and fitting expertise with the quality, trusted steel door-sets from the leading manufacturer.

Vision Panel

Sadly, it is true that even the most secure, and expensive, entry and security systems are vulnerable to attack and breach from well organised and properly resourced criminals.

Mitigating the risk of break in usually involves a combination of deterrence and delay, expertly fitted the right doors can make a big difference.

Sourced from Strongdor's Climador, Steeldor and Firedor ranges, all our steel doors are bespoke. Custom-made and configured with hardware to your specification.

Single, double or leaf and a half, with a choice of certification and ratings including PAS 24 security and PAS 23 weather test ratings. These personnel and fire exit doors are fabricated from the best quality zinc-impregnated steel, offering extra protection from corrosion.

Vision and louvre panels

With a host of compatible features, such as louvre and vision panels. For larger apertures, the door-sets can also be supplied with solid, glazed or louvre over and side panels.

Full hardware options including closers, panic furniture, stays, cylinders and access devices are available on request. We also offer specialist acoustic and ballistic rated doors as well as glass profile doors. Please ask for details.

Fire rated performance

The Firedor range has full four hour fire-rating, and also benefits from superior security features such as astragal and dog bolt hinges. A low level DDA approved threshold comes as standard.

Firedor is also available with vision panels, with full four hour rating, and louvre panels which are fire tested to 2 hours.

WDC STEEL DOOR TECHNICAL SPECIFICATIONS

Available on most door-sets in the range

STEELDOR LEAF

■ 45mm thick Door leaf with flush lipped astragal constructed from 2 x 1.2mm thick 'Rustec' sheets, which are Dutch folded and internally bonded together ■ 42mm thick 'Hexatex' core ■ 5 year warranty against rust as standard for all colour coated doors.

WDC proven service

Whichever steel doors you choose, they will be expertly fitted by a fully trained, experienced WDC technician. We give you attentive expertise that comes with a minimum of intrusion, fuss and mess.

Coating and finish

The doors are supplied in a high quality finish powder coating to ensure maximum durability. A full range of RAL and BS colours are available, including metallics and pearlescents at extra cost. Strongdor are an approved C5 marine grade specialist, providing unmatched corrosion resistance in doors supplied to highly corrosive and saline environments.

Certification and rating

We can supply steel doors that are fully tested and rated to protect from intruders and the worst elements. Secure - most door sets are tested to PAS 24. Air permeable - the standard is EN1026:2000 and was passed class 4 – 600Pa (113kmh) test pressure. Weather-tightness - the standard is BS 6375: Part 1: 2009 (test to EN1026:2000, EN1027:2000, EN12211:2000) and passed the 1200 exposure rating. Water-tightness - the standard EN1027:2000 was passed 150Pa for outward opening and 100Pa for inward opening. Wind load - the EN12211:2000 standard was passed 1200Pa (Class A3) 98 mph

WDC IN ASSOCIATION WITH

Automatic Sliding & Swing Doors

WDC Automatic Doors & Shopfronts offers a complete installation service including technical sales advice and design support, through to onsite installation.

WDC Automatic Sliding Doors can be adapted to the needs of each installation. Every installation is unique and here at WDC we ensure that a tailor made design is delivered on time, every time.

- WDC Automatic Sliding Doors and swing doors are prepared for heavy traffic, both in large (supermarkets, hotels, airports, hospitals) and in small and medium buildings (offices, chemists, post offices, banks, restaurants) The most important features of our door systems are their silent movement when opening and closing, plus dynamic stability with quick and easy installation.
- All automatic door equipment is designed to meet the rigorous safety requirements of BS EN16005 and is installed by Automatic Door Installation Association (ADIA) accredited engineers, conforming to all UK and European standards

WDC installers are fully trained to BS EN16005 standards, all our installers are ADIA qualified and hold the CSCS qualification.

Digital Selector Available

NEPTIS is available in different models to fulfil any customer demand:

- version with integrated emergency battery
- compact size and elegant design
- reliable in any application

Modernization and Upgrades

Enhance and extend the performance of your entrances with modernization and upgrades, Keep your entrances performing well.

Automated entrances are a long-term investment, and just as your business develops over time, so do entrance automation technologies and regulations. To help address the changing needs, we offer a variety of modernizations and upgrades.

Modernizing and upgrading your entrances can contribute to a more sustainable building, reduce maintenance and energy costs, and at the same time improve convenience, reliability, safety, efficiency and aesthetics. It is a cost-effective way to make sure the entrances match both current and future needs.

The WDC Retrofit package is suitable for upgrading the control element of any brand of automatic sliding door, with no changes to the door construction needed. The upgrade takes just a few hours, and results in a safer door that is both more reliable and more efficient.

If you're looking to upgrade the control element of any type of automatic sliding door, the WDC retrofit packages will minimise downtime by allowing you to replace the mechanical and electrical components without changing the entire door construction. The retrofit kit is a universal solution capable of controlling other manufacturers operators. With this modernization we can ensure that your door complies with the latest standards EN BS 16005.

Benefits:

- Significantly reduced costs when compared with rebuilding
- Most door parts can be retained
- No changes in appearance
- No modifications needed to existing sliding doors
- After installation, your door system meets current legal requirements for personal safety
- State-of-the-art technology ensures smooth operation for many more years
- Sure availability of spare parts
- Suitable for all types of sliding doors
- Reduced maintenance
